SHOW

18-19 October 2023 • ExCel London

Edge to Cloud Solutions – Exploring
how solutions are evolving to support
latest technology trends.
by iSMA **CONTROLLI**

Jim Sword
Sales Manager - UK&I

Agenda

- How solutions have evolved to date
- Today's market trends.
- How solutions are evolving.
- What we are doing to meet these needs.
- What of the future.
- Q&A
- Close

Innovative **Buildings**
Solutions

How solutions have evolved to date.

Innovative **Buildings**
Solutions

How solutions have evolved to date

Early Systems

- Standalone Buildings
- Standalone solutions
- Plant controlled Independently
- Hardwire interlocks

Early BMS

- Standalone Buildings
- Standalone solutions
- **Plant control integrated in software**
- **Communication protocols**

Remote BMS

- Plant control integrated in software
- Communication protocols
- **Remote monitoring alarming**
- Dial up solutions

Integrated BMS

- Remote monitoring alarming
- Open protocols
- **Interoperability**
- **Integrated Building Automation Solutions**

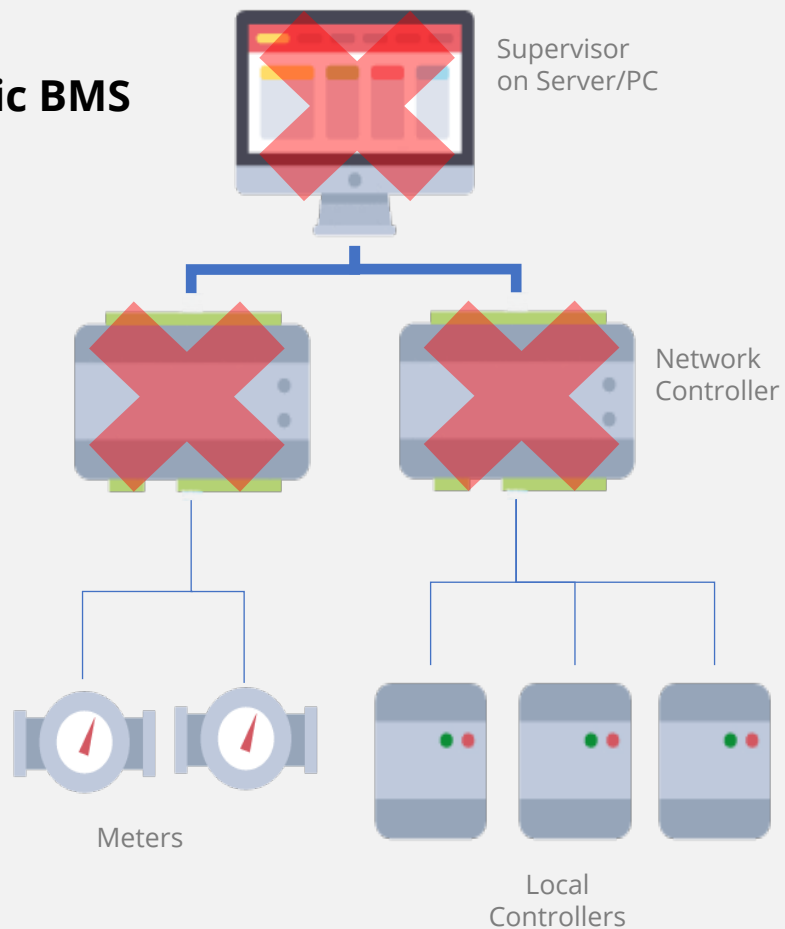

Web Enabled BMS

- Remote monitoring alarming
- Interoperability
- Integrate Building Automation Solutions
- Open protocols
- **IP Connectivity**

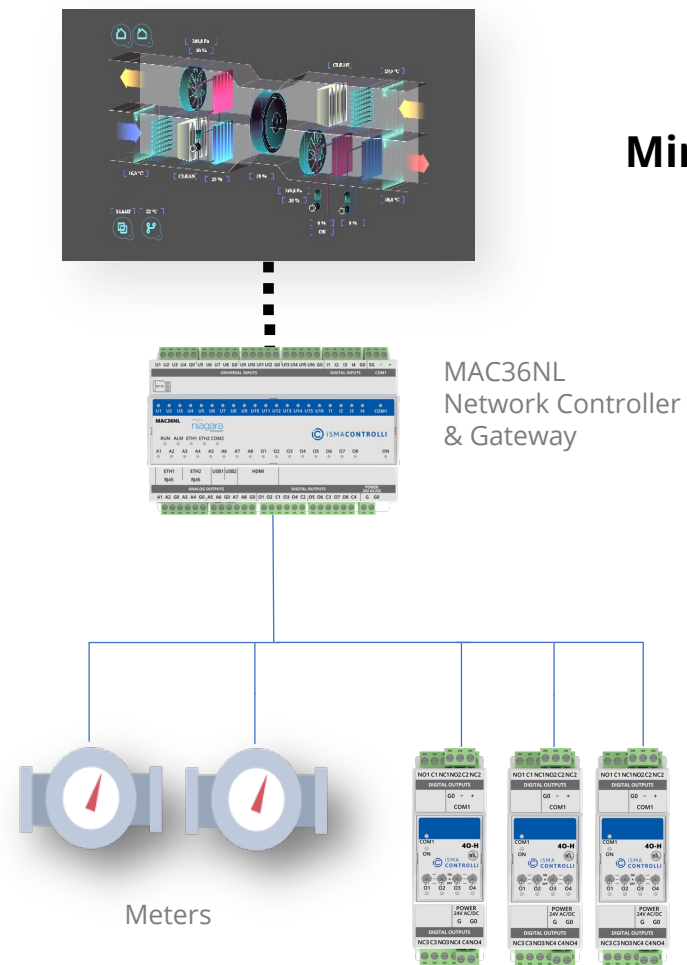

How solutions have evolved to date.

Classic BMS

Mini-BMS

Today's market trends

Innovative **Buildings**
Solutions

Smart Buildings Trends

- Greater user interaction
- Wellness
- Integrated solutions
- Intelligence moving to the Edge
- Cloud based analytics
- Optimisation
- Cyber Security

Smart Buildings Trends

PC's & Laptops

Tablets & Mobile
Devices

Connected Home
Devices

Interesting Statistics

- Estimated 41.6 billion IoT devices by 2025
- 79 ZB (ZettaBytes) Data
- 127 new connected devices per second – 12m per day
 - Source IDC (International Data Corporation)
- 1.7mb/ps –Every Human globally
 - Source Tech Jury
- 75m Google home units sold – 2025

.... Automation, connectivity & greater interaction are becoming an expectation

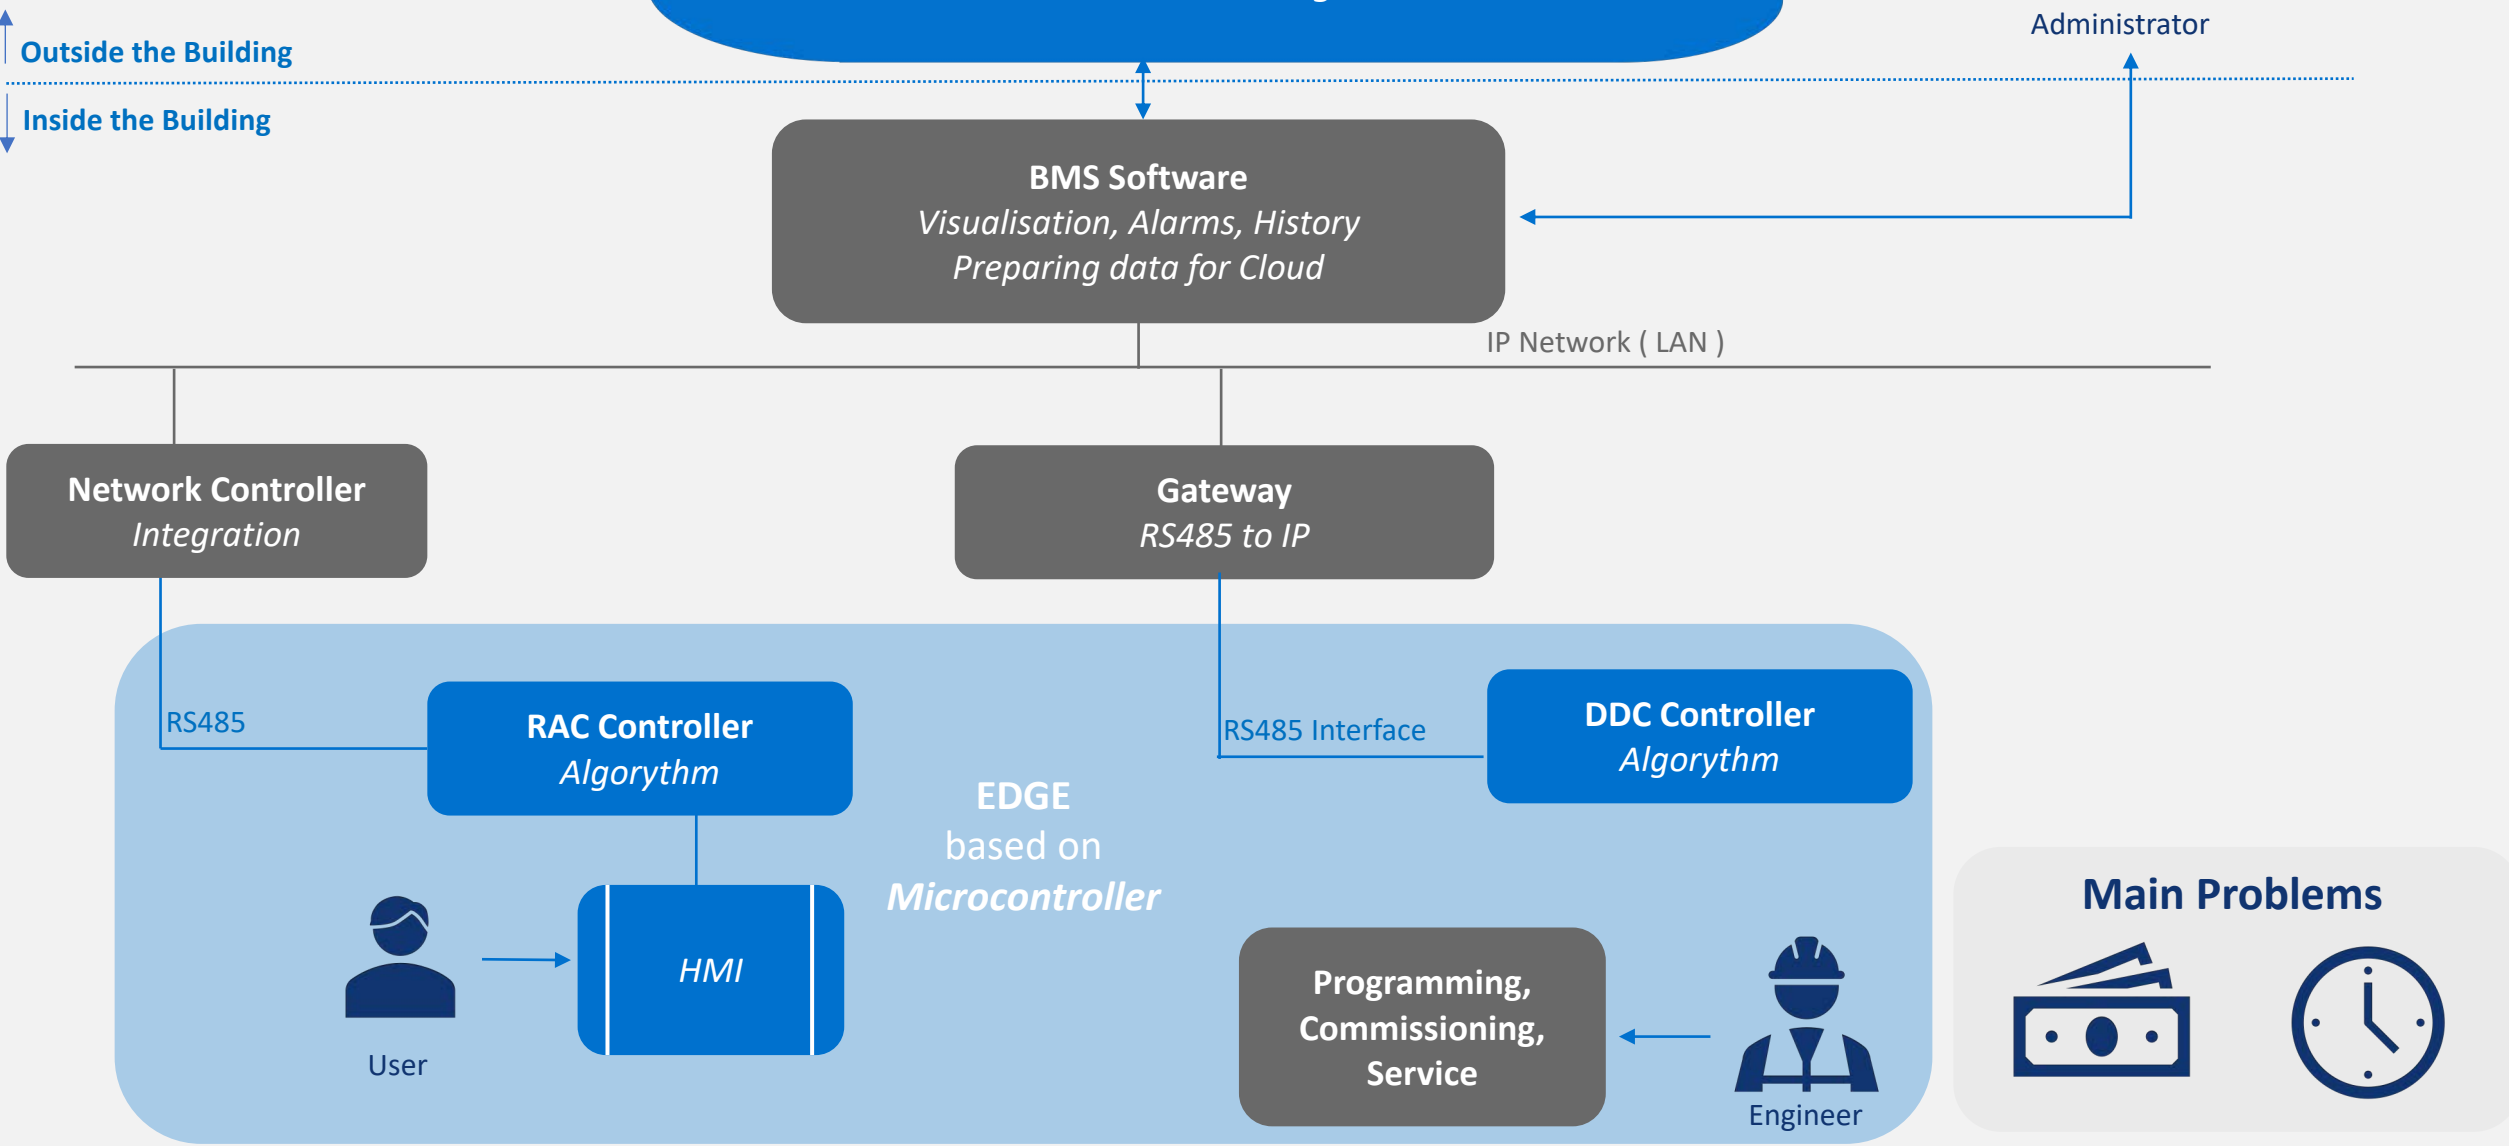

How solutions are evolving

Innovative **Buildings**
Solutions

BMS - Classic

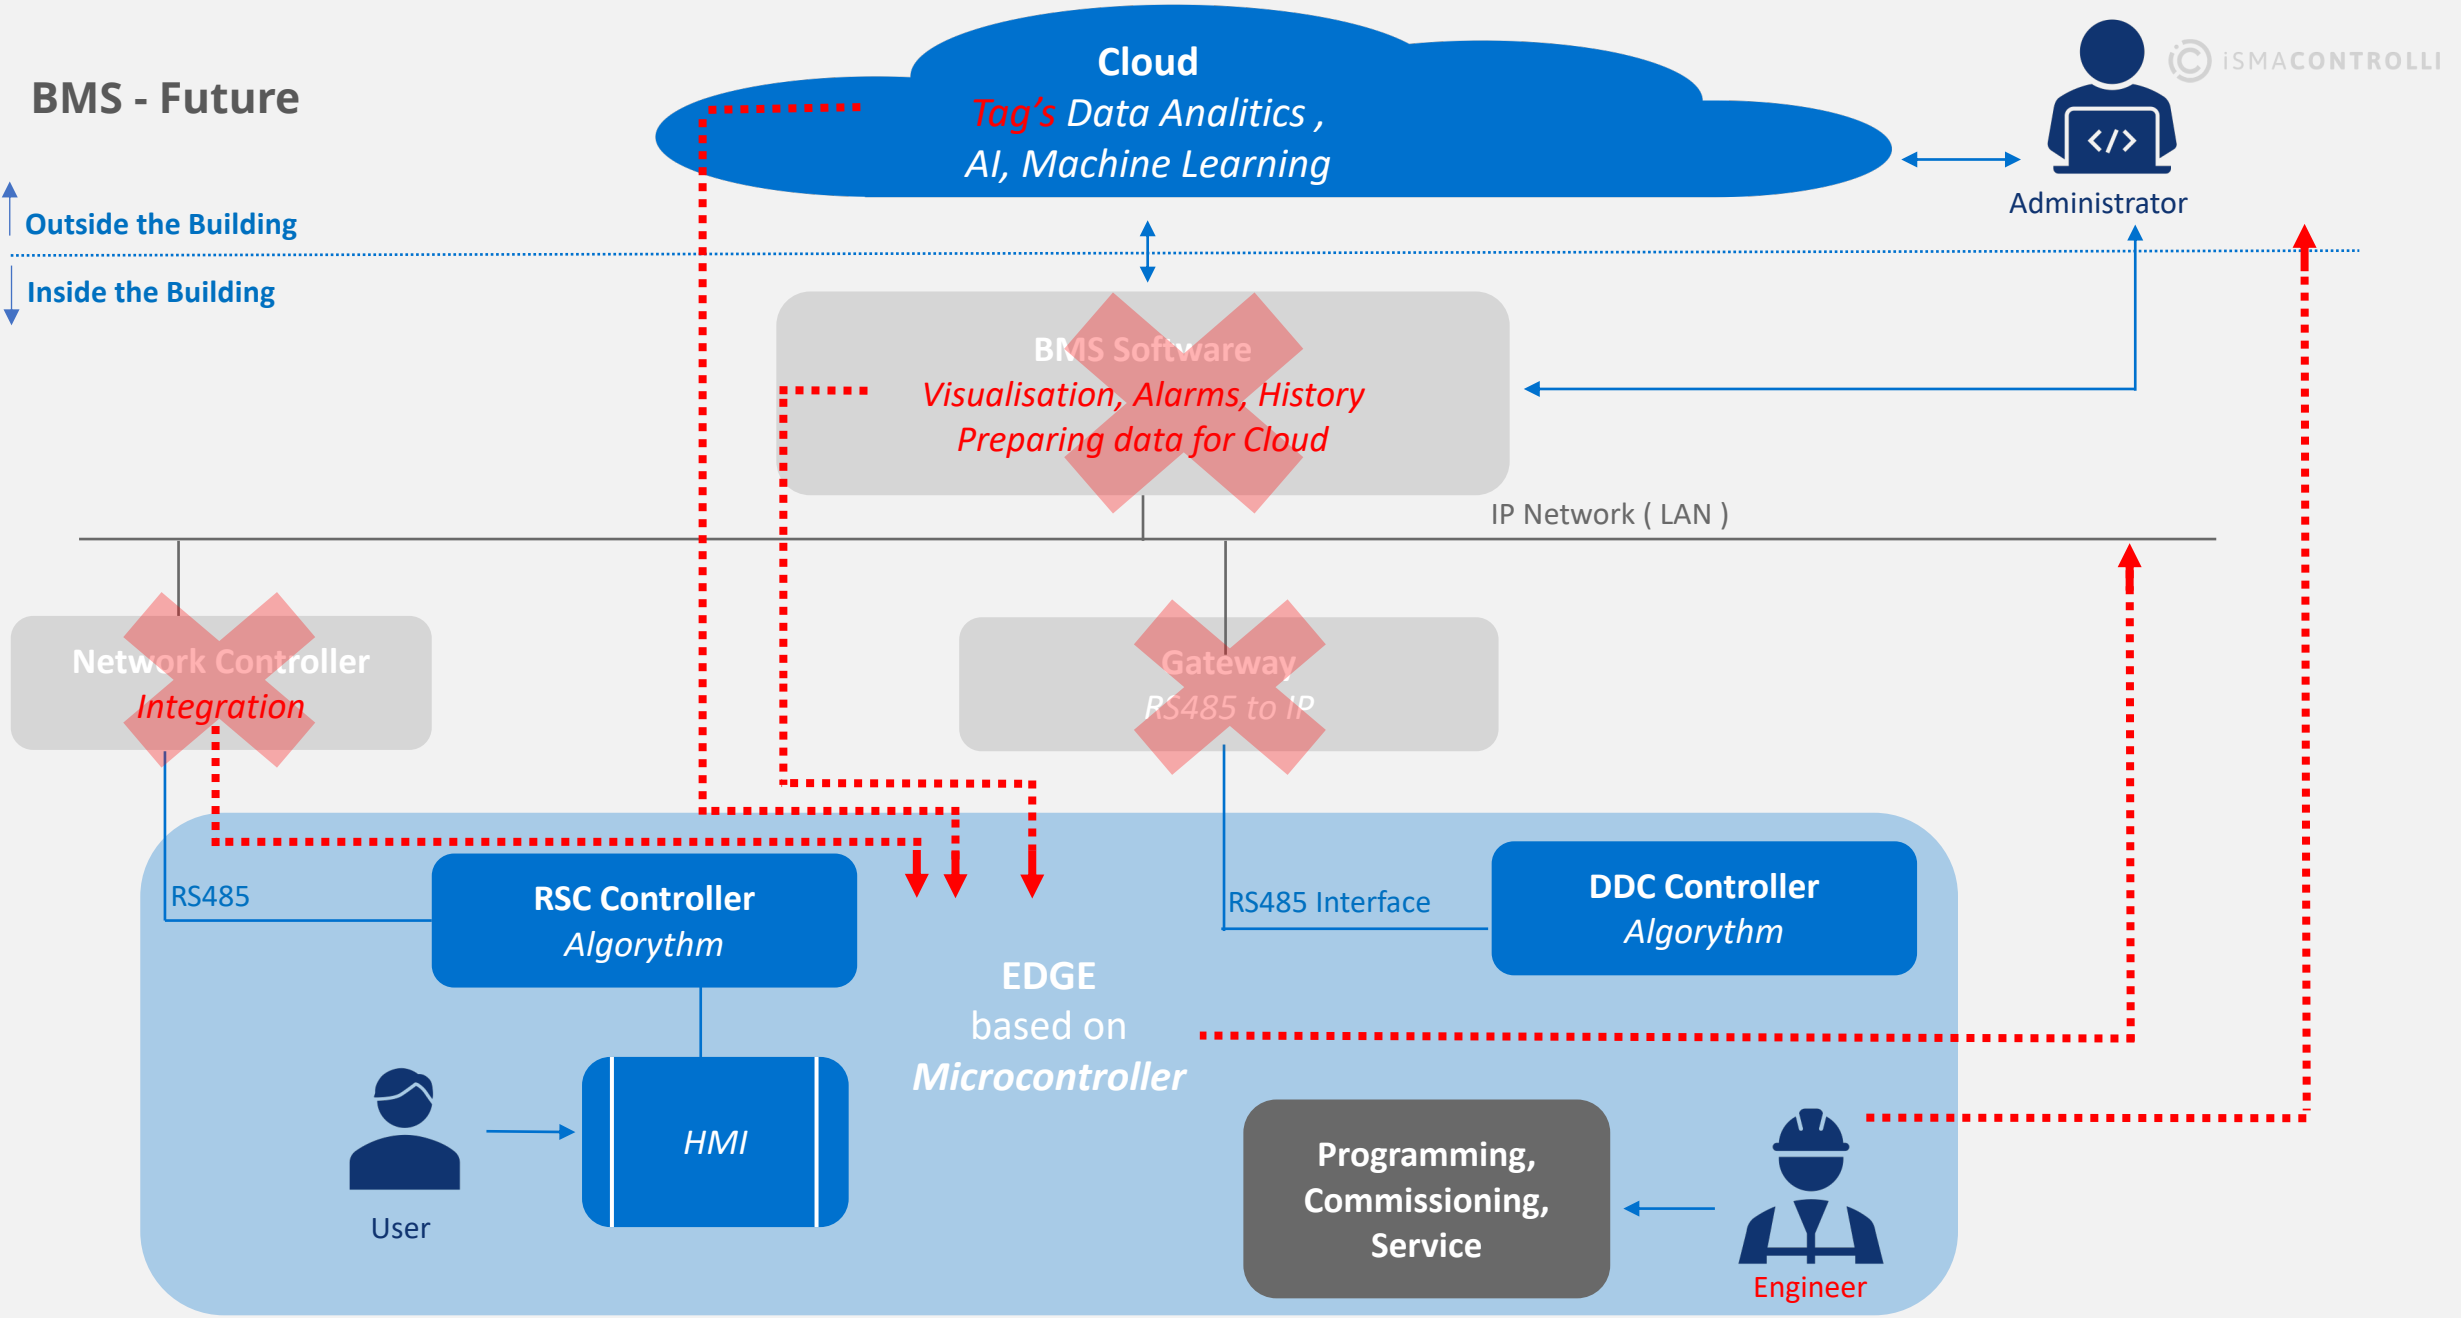

Main Problems

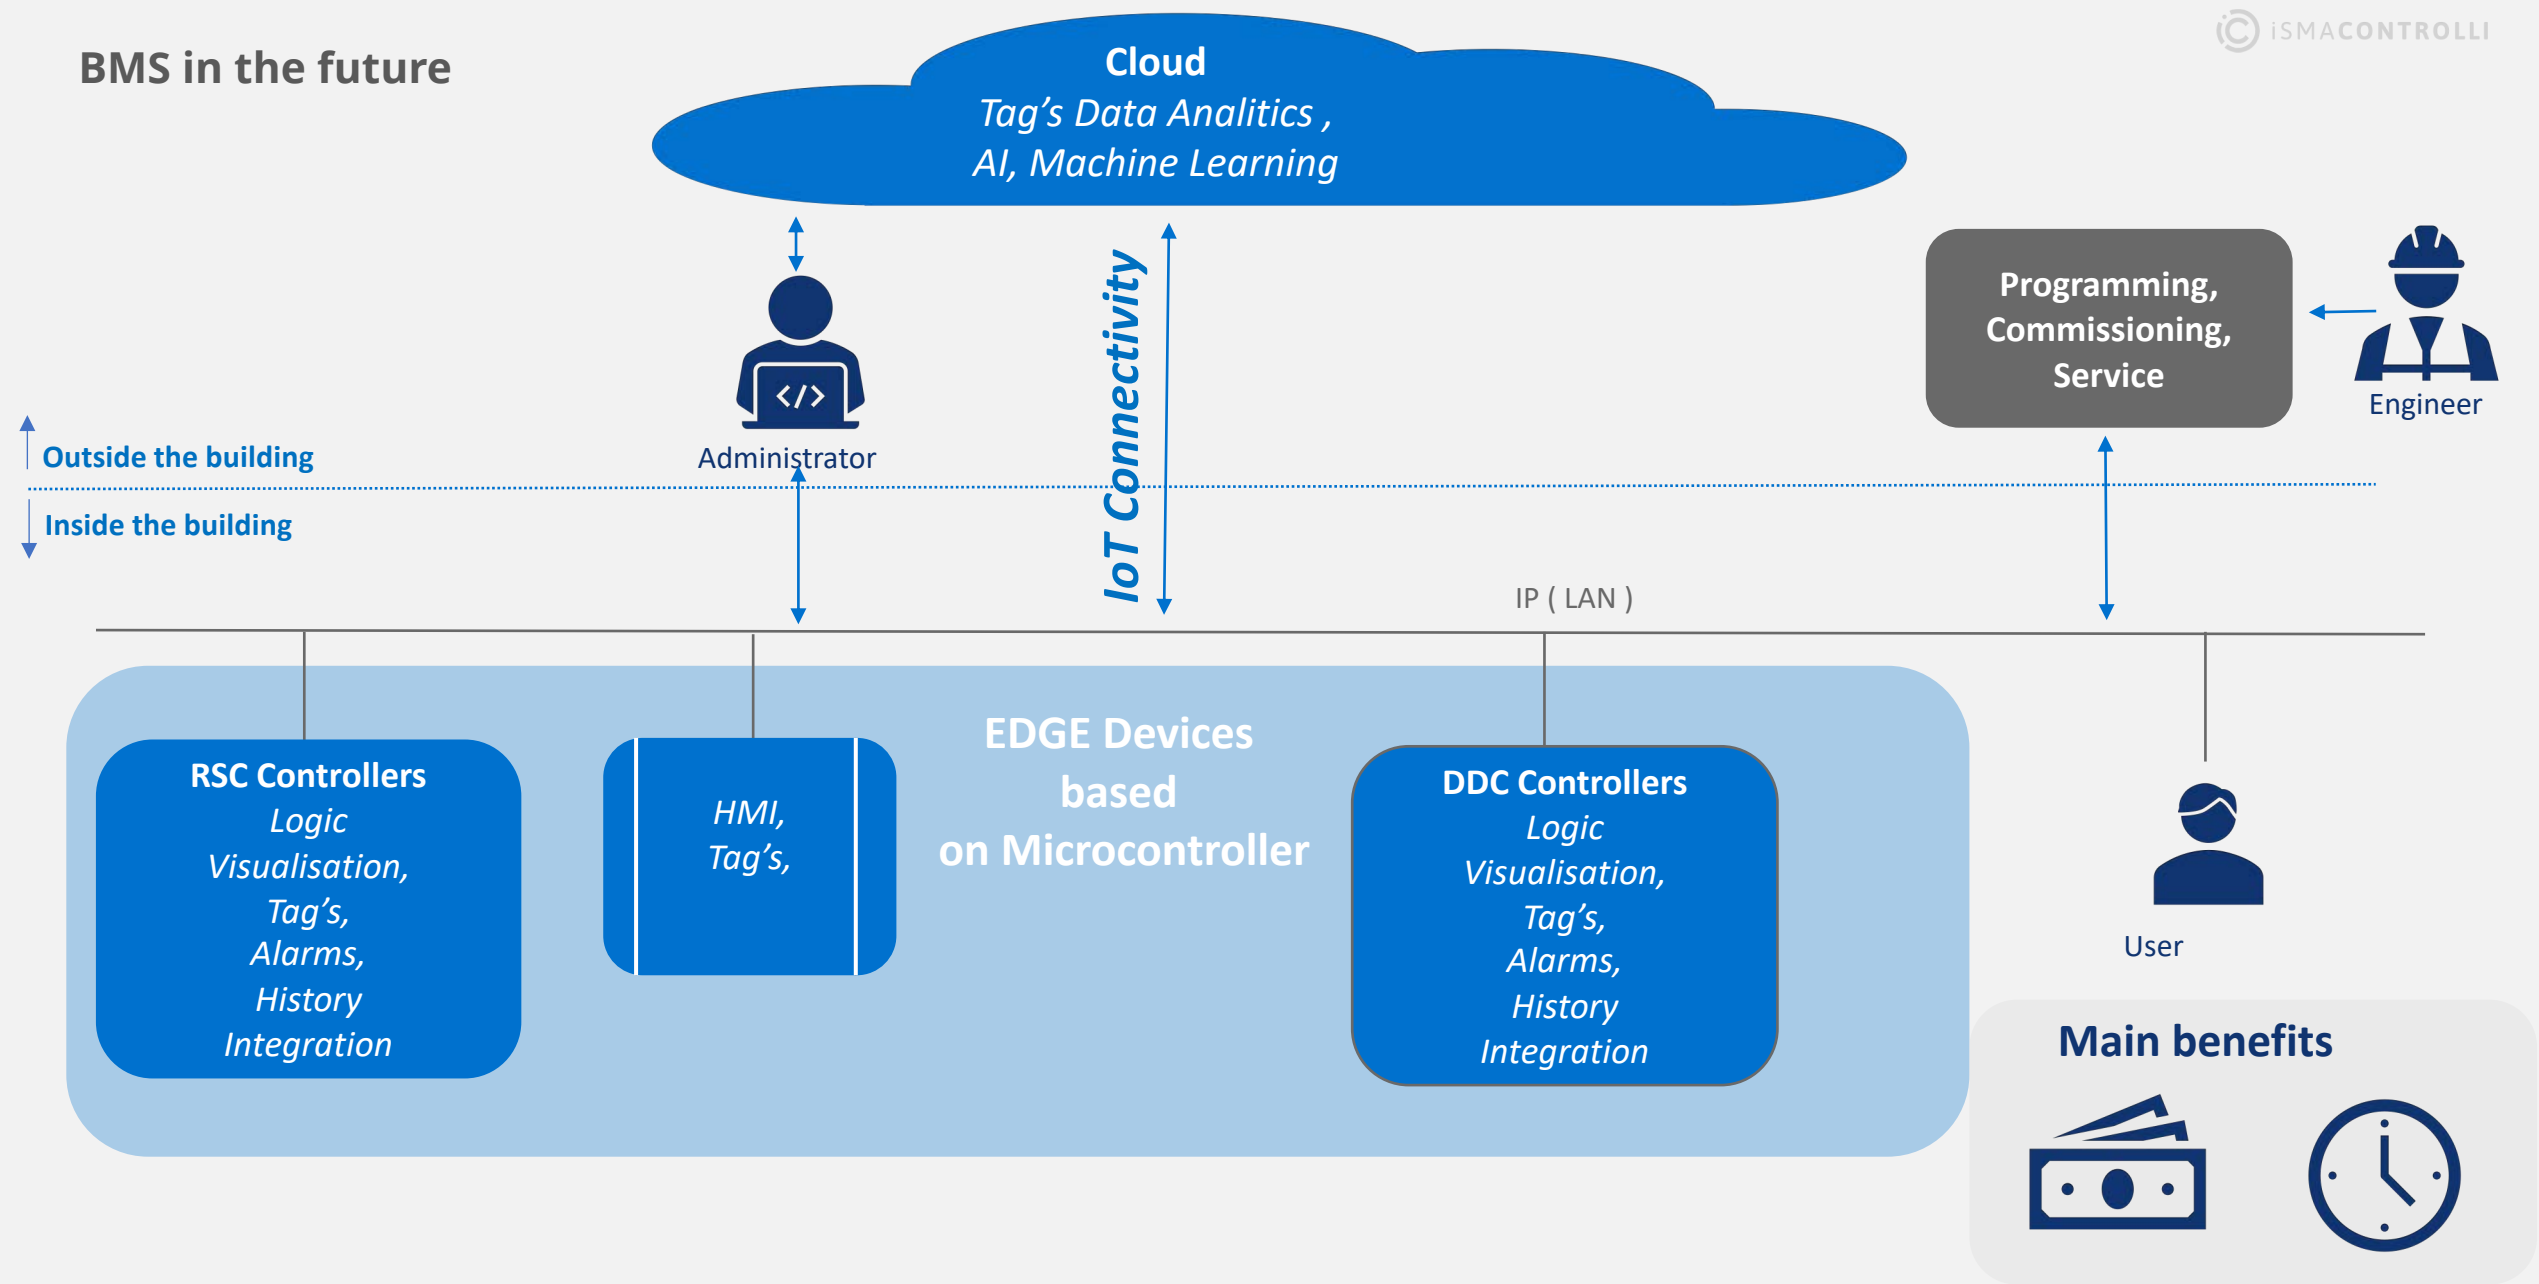

BMS - Future

Outside the Building
Inside the Building

BMS in the future

What are we doing to support evolution.

Innovative **Buildings**
Solutions

Smart Buildings Trends

PC's & Laptops

Tablets & Mobile Devices

Connected Home Devices

Smart Buildings Trends

**Plant and Network
Controllers**

**Room and Local
Controllers**

Field Devices

nano EDGE ENGINE

It is an IoT-ready embedded software engine for microcontroller based devices

nano - very light to be installed on field \edge devices (actuators, automation and network controllers) based on microcontroller and not microprocessor

EDGE – it is designed to provide field devices with smart functionalities and secure connectivity (SSL/TSL) to make them Edge Devices Ready for the IoT

ENGINE – it is designed to be hardware independent in order to be easily installed on different hardware bodies

High-end technology for embedded devices in the building.

The IoT-ready **nano EDGE ENGINE** provides unprecedented capabilities for a microcontroller-based device and takes them to the next level.

Take advantage of

- real-time programming,
- multiple cycle-driven applications,
- automatic multiprotocol exposure,
- cloud connectivity.

Smart Edge devices

Smart Field devices

Future Solutions

Zone Controllers – Room Application Controller

Key Functionalities and Features

BACnet and Modbus onboard

Native BACnet IP, Native Modbus IP, and Modbus RTU Master protocols.

nano EDGE ENGINE onboard

Realtime Programming

RAC18-IP is a freely programmable multifunctional controller dedicated for comfort and HVAC applications.

Real-Time Clock (RTC)

I/Os

Up to 18 inputs and outputs fitting most of room and zone applications.

Two Ethernet ports

Working in a switch mode with Fail-Save Protection.

USB host and Micro SD Card

USB host for power supply.

RAC18-IP

MAC36PRO

Future of mini-BMS

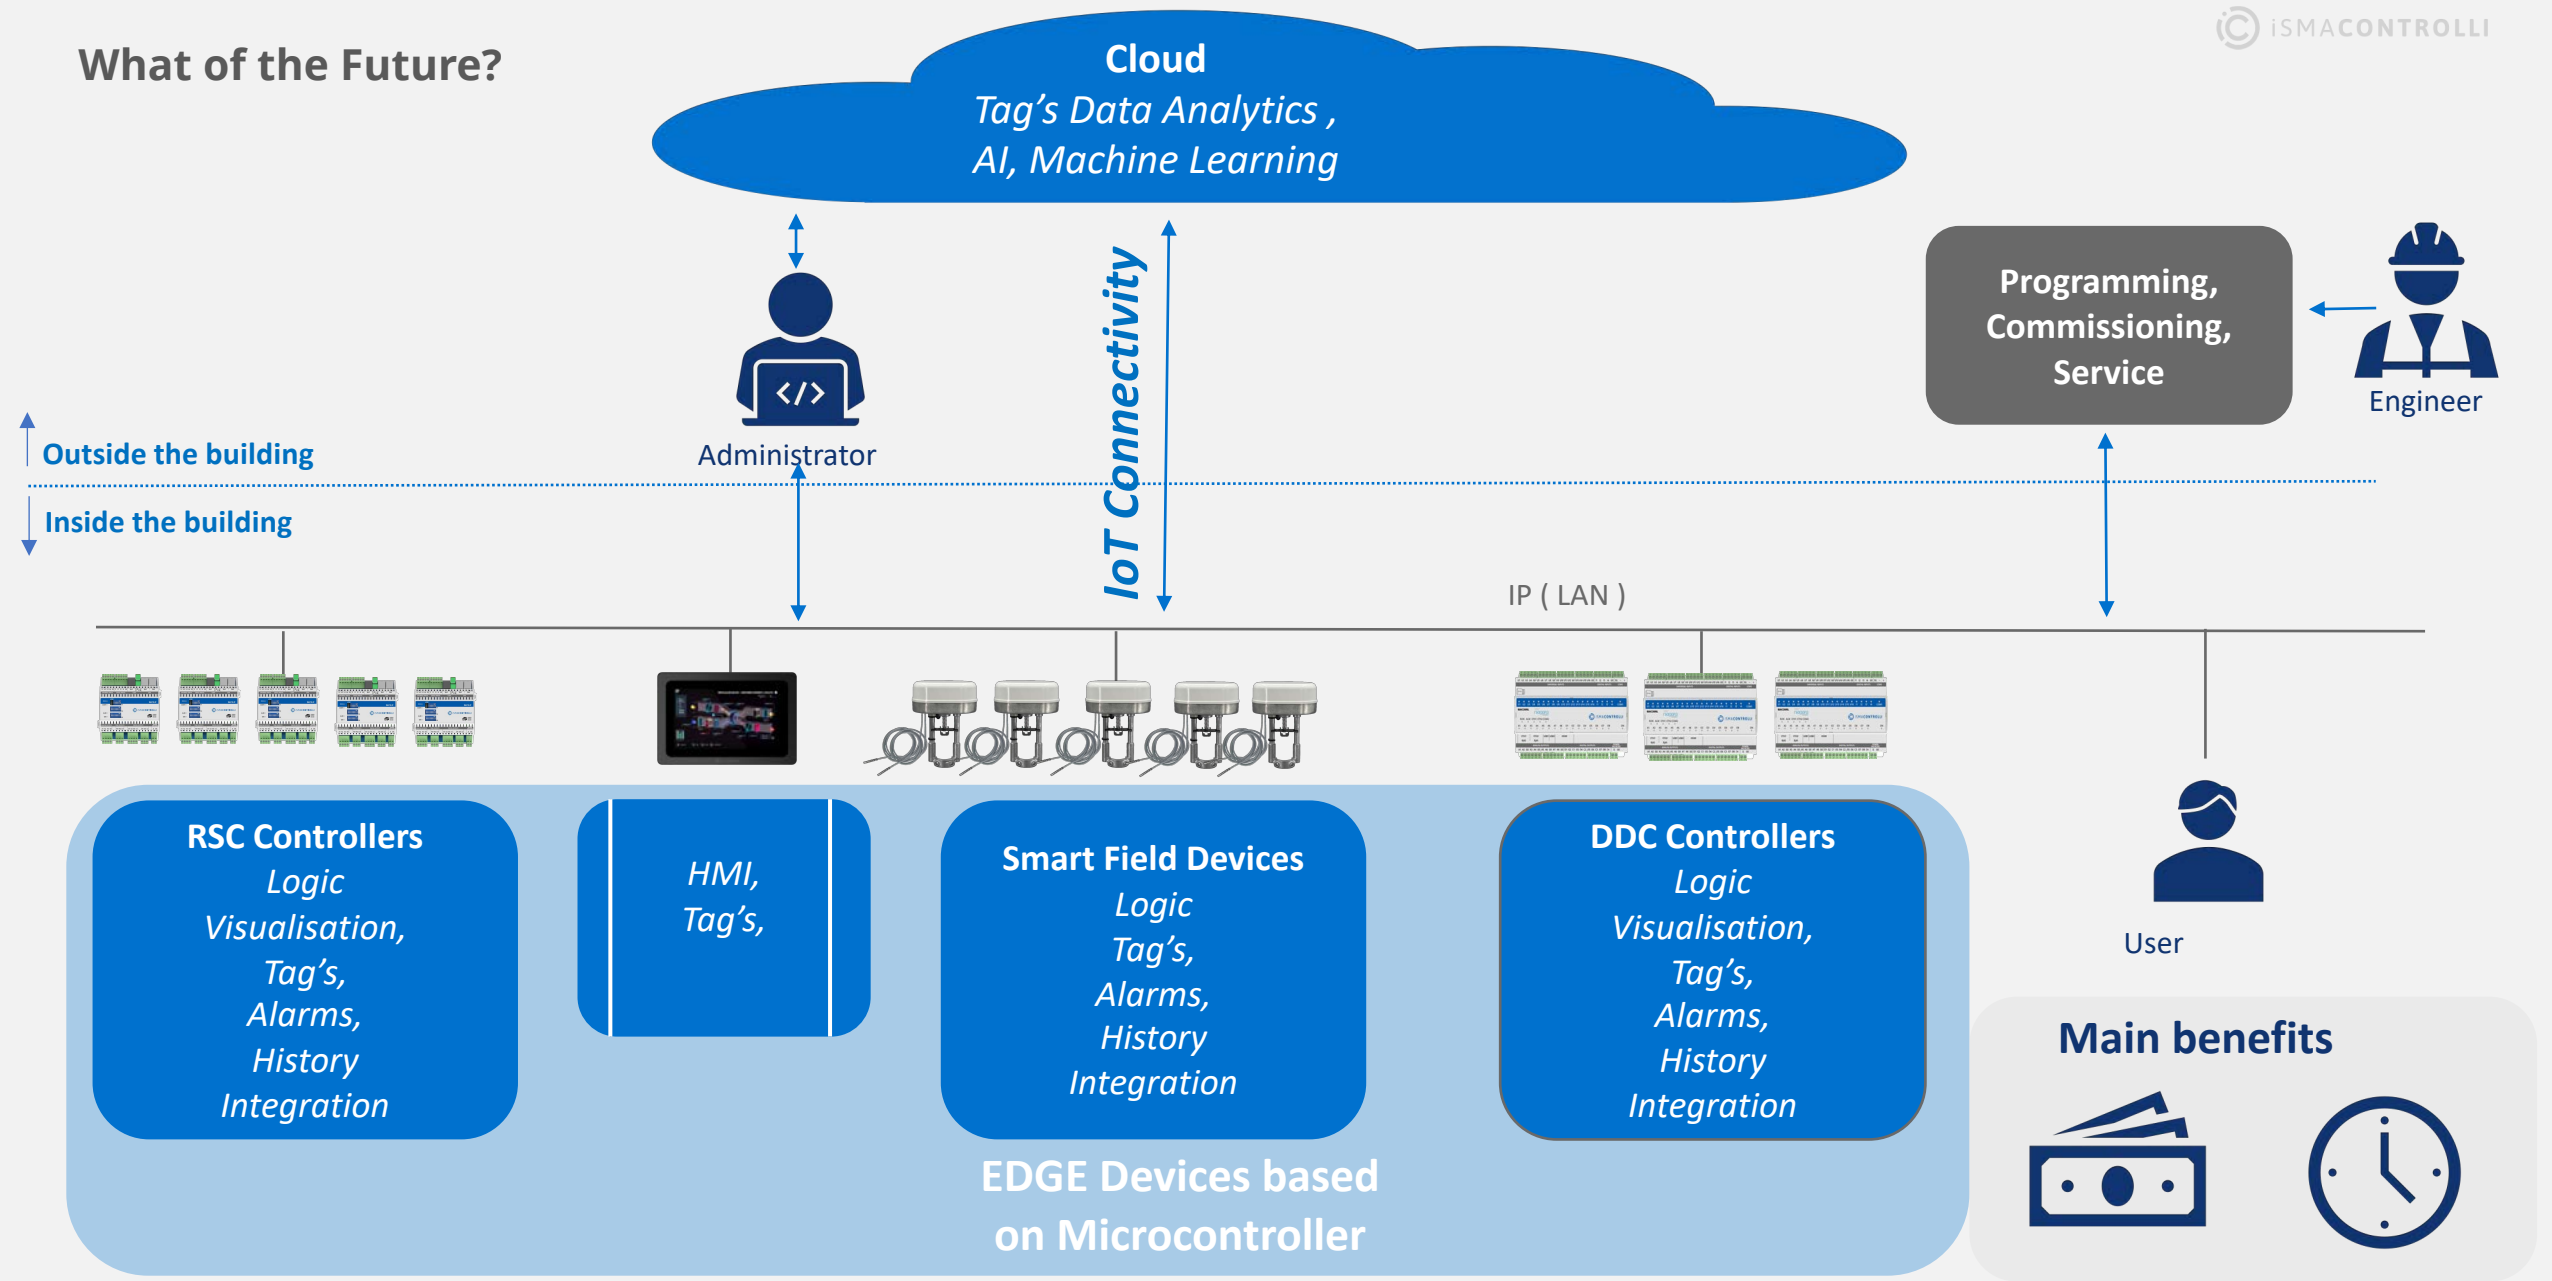

What of the future?

Innovative **Buildings**
Solutions

What of the Future?

Thank you

Thank you
