Maximize energy storage and solar energy systems.

CRESTRON.

Security and more

Sustainability

Control Interfaces

- **Touchscreens**

- **Mobile Devices**

- **Remote Controls**

- **Keypads**

Design Considerations

Ensure the success of your project by:

- Planning early

- Educating the stakeholders

- Partnering with a technology professional

Questions to ask

- **How does one aspect of a smart home system work with or impact another?**

- **How reliable is the equipment being installed?**

- **How is it serviced if need be?**

- **How much physical cabling do I need**

- **How can I control all these systems in an intuitive way?**

CRESTRON.

Crestron Home OS

- **Intuitive, Attractive User Interface**
- **Fast and easy to Configure and Deploy**
- **Crestron Home is a solution for the Custom Home**
- **Home gets more powerful with regular updates**
- **Continual innovation**
- **One system for all technology categories**
- **One platform for customer's multiple homes**
- **Best-in-class hardware designed by world class engineers**
- **Award-winning service & support**

Final Remarks and Questions

Thank You

Smart Buildings

SHOW

9-10 October 2024 • ExCeL London

We look forward to seeing you in 2024
